

GuidedSAM-Plume

User Guide

Start view

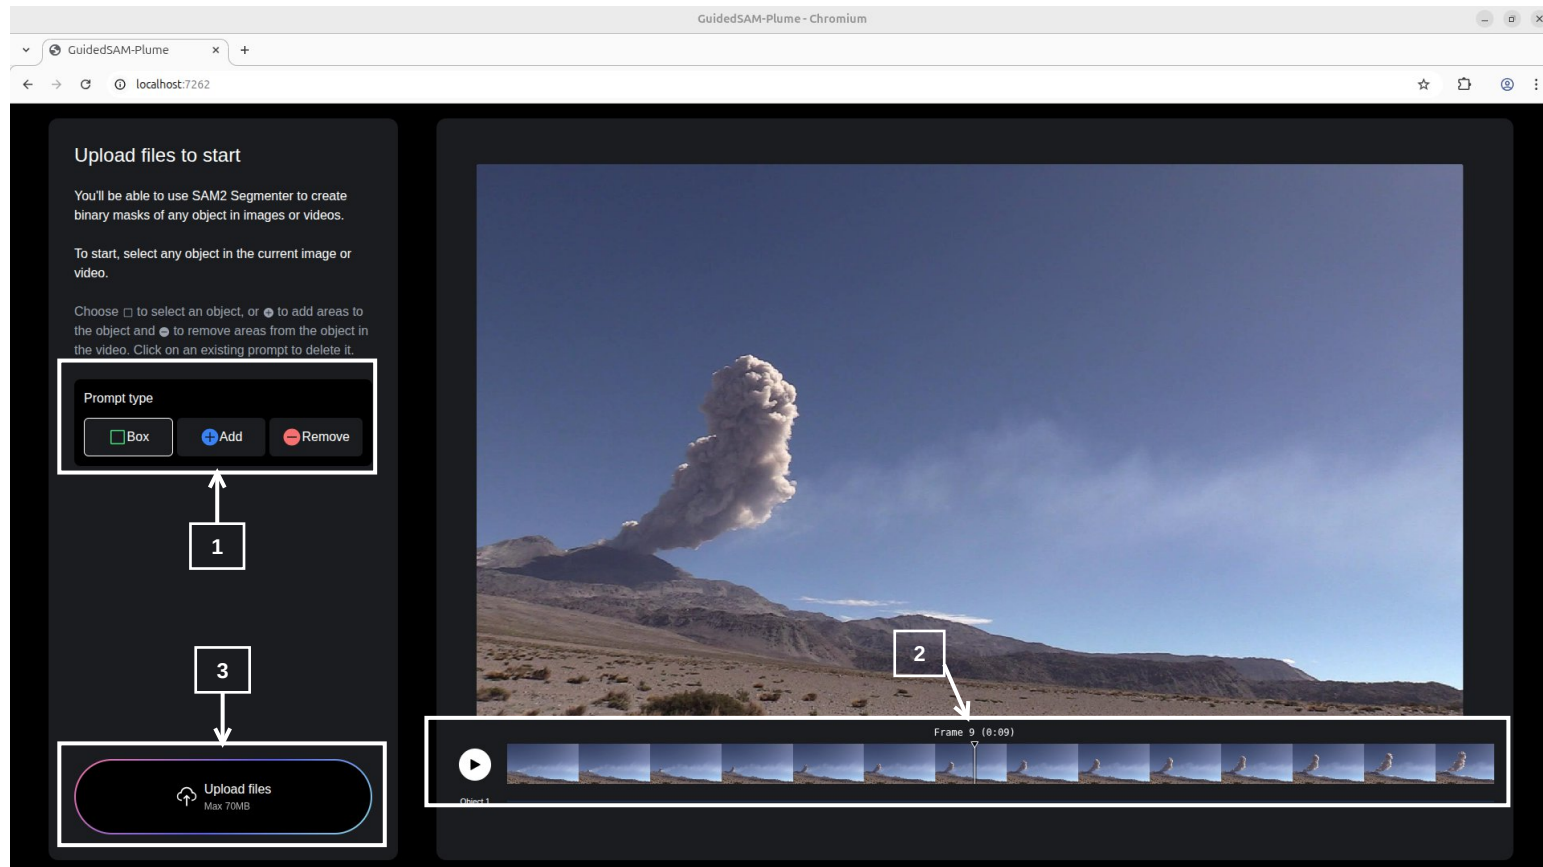

1. Click on the upload button to choose a video or images to upload. You can also drag and drop files directly over the button.

Accepted formats are:

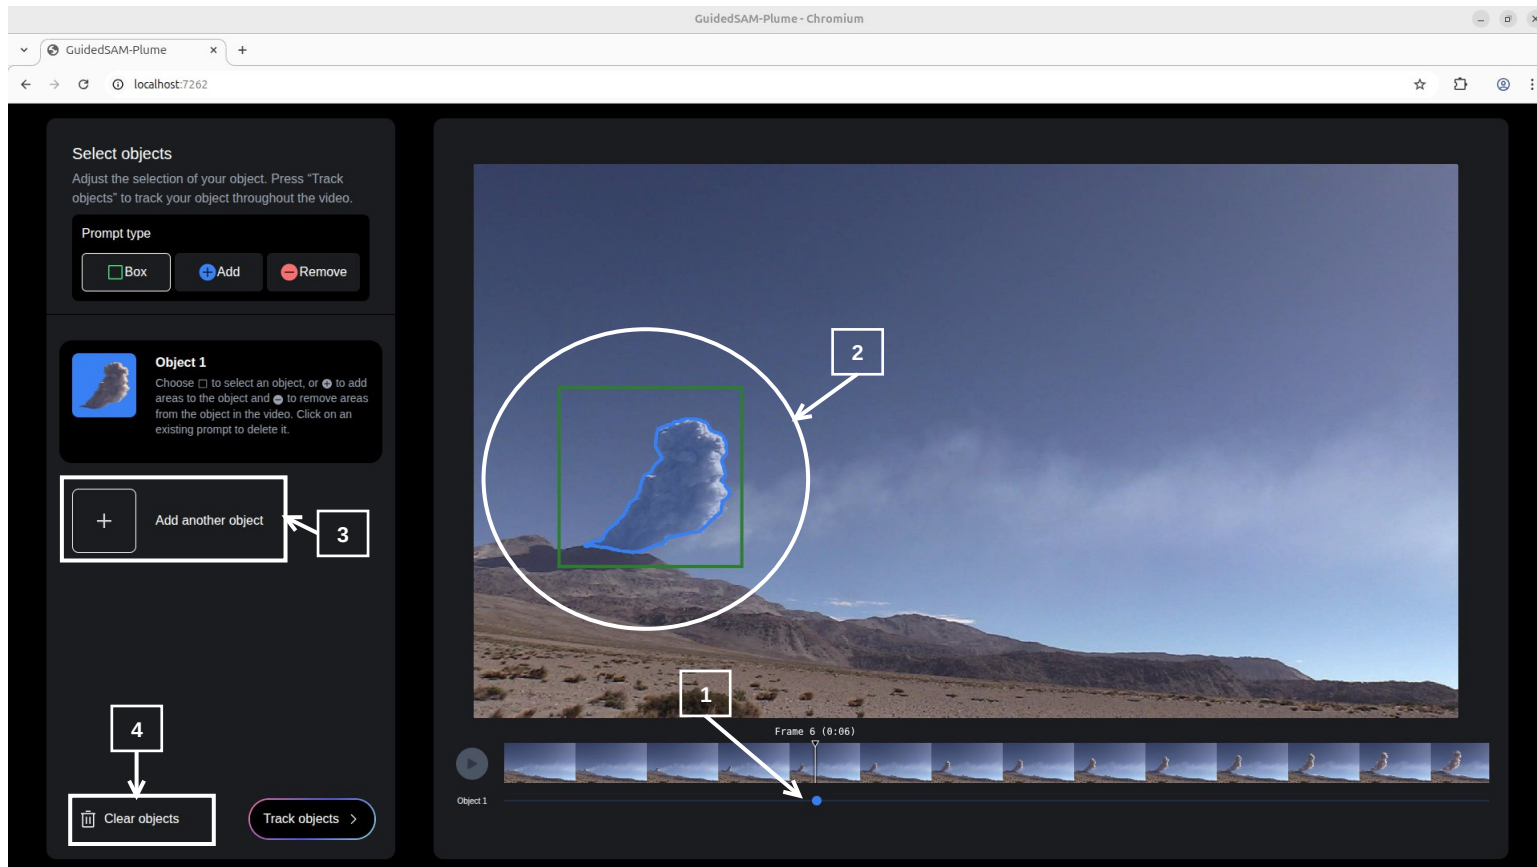

- Videos: .mp4, .mov, .zip. The zip files must contain a sequence of images numbered starting from 0.
- Images: .jpg/.jpeg, .png, .tif/.tiff, .webp, .gif, or .bmp.

Mask editing view: case of videos

1. Prompt type selection
2. Video player controls
3. Replace the uploaded video with a new one

Mask editing view: case of videos

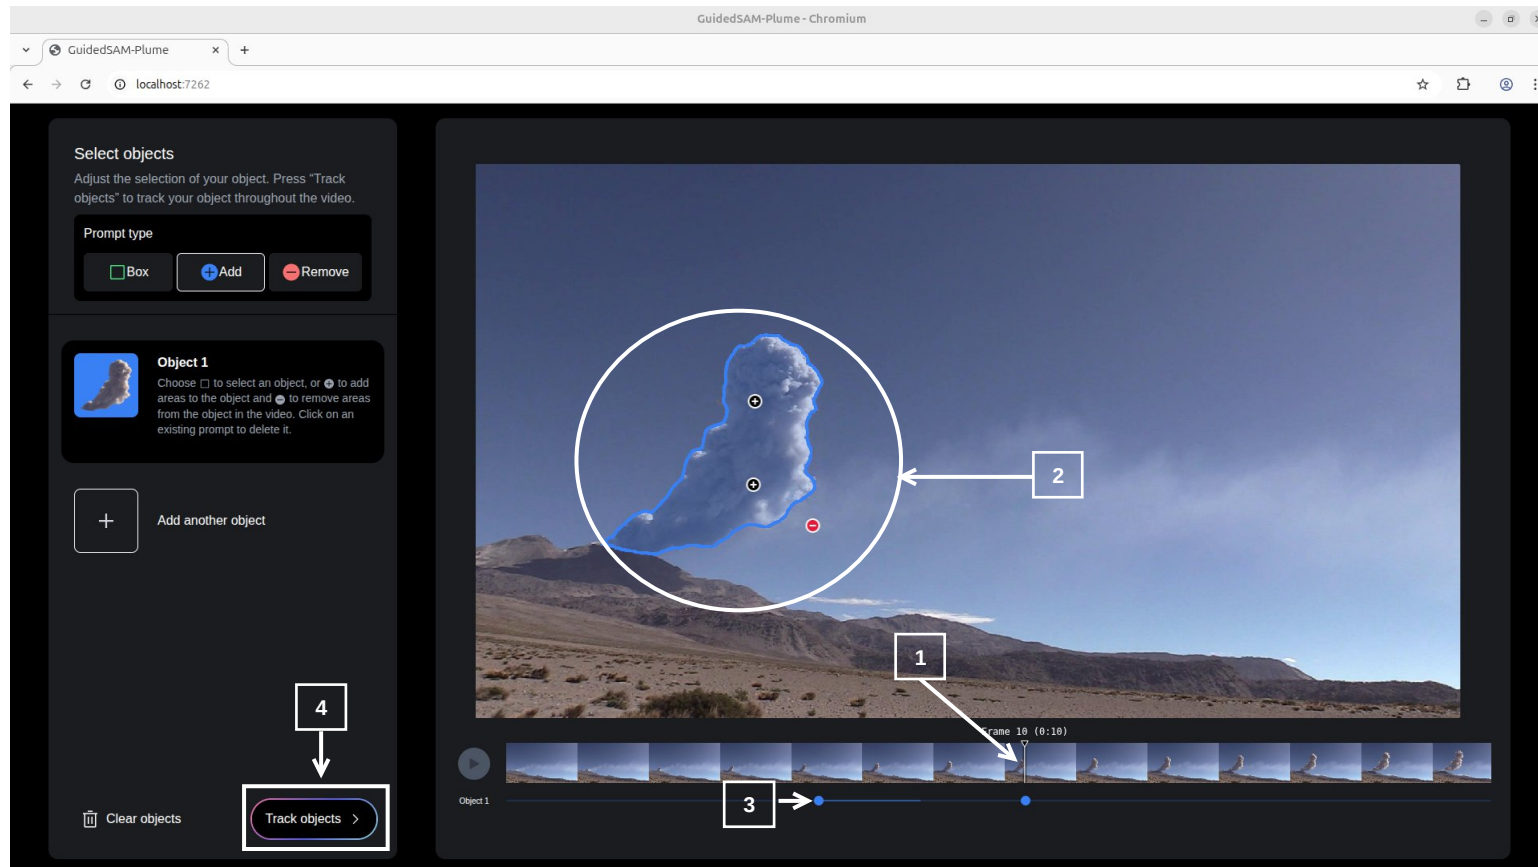

1. Go to the keyframe you want to interact with
2. Select the object using the desired prompt type
3. You can add other objects if you want to track multiple ones
4. Use this button if you want to start over (remove all prompts and objects)

Tips :

- Click on an existing prompt to remove it
- To help you having precise interaction, you can zoom in/out using the scroll wheel. You can pan with wheel pressed.

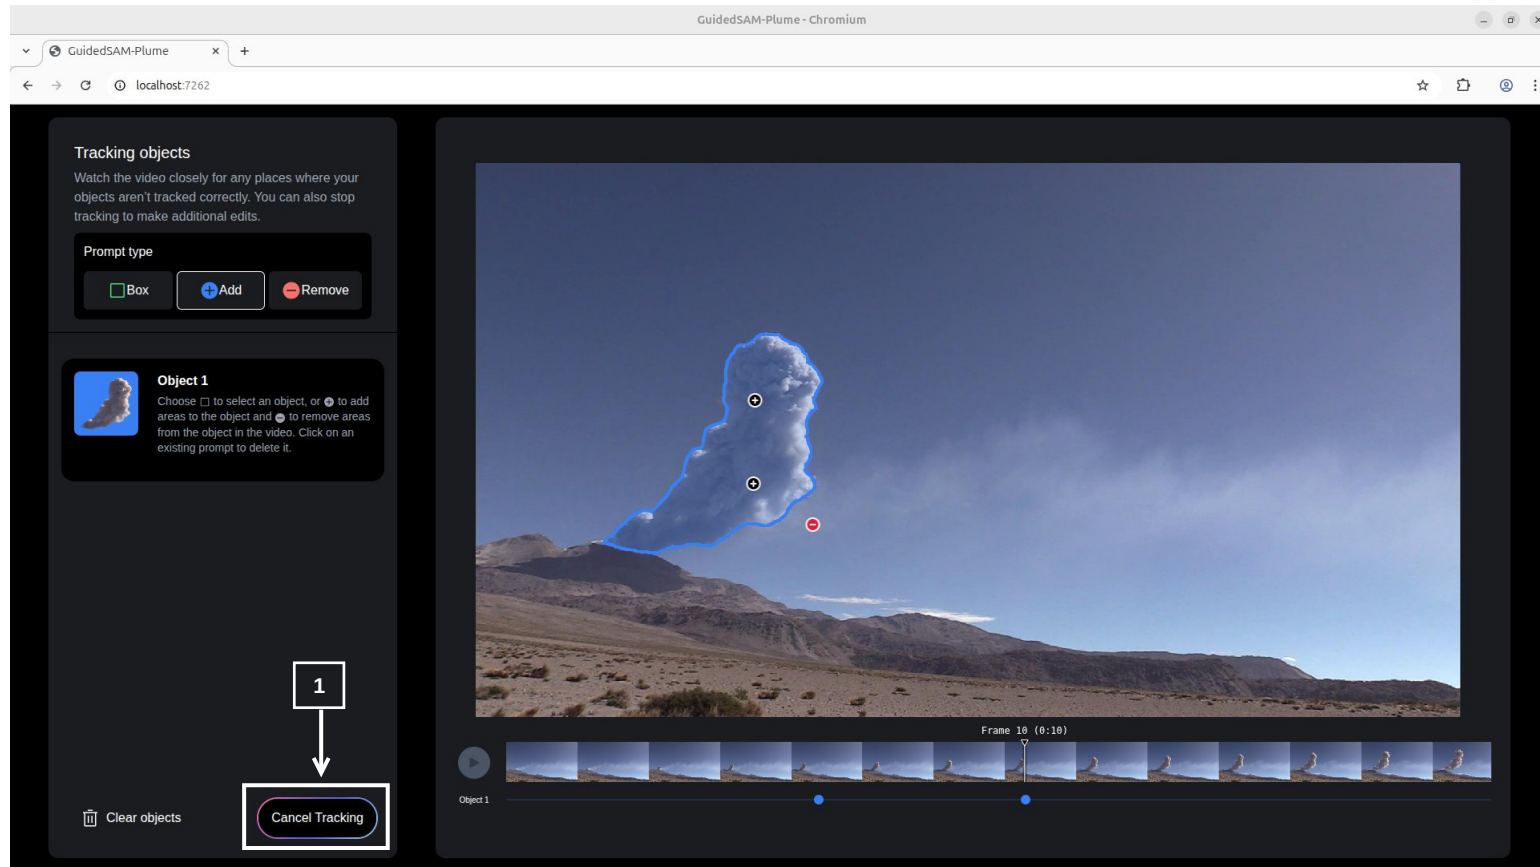

Mask editing view: case of videos

1. You can select additional keyframes
2. You can refine results adding more prompts
3. Select an retrieve easily already prompted frame
4. When you are ready, press the button to start tracking the objects through the video

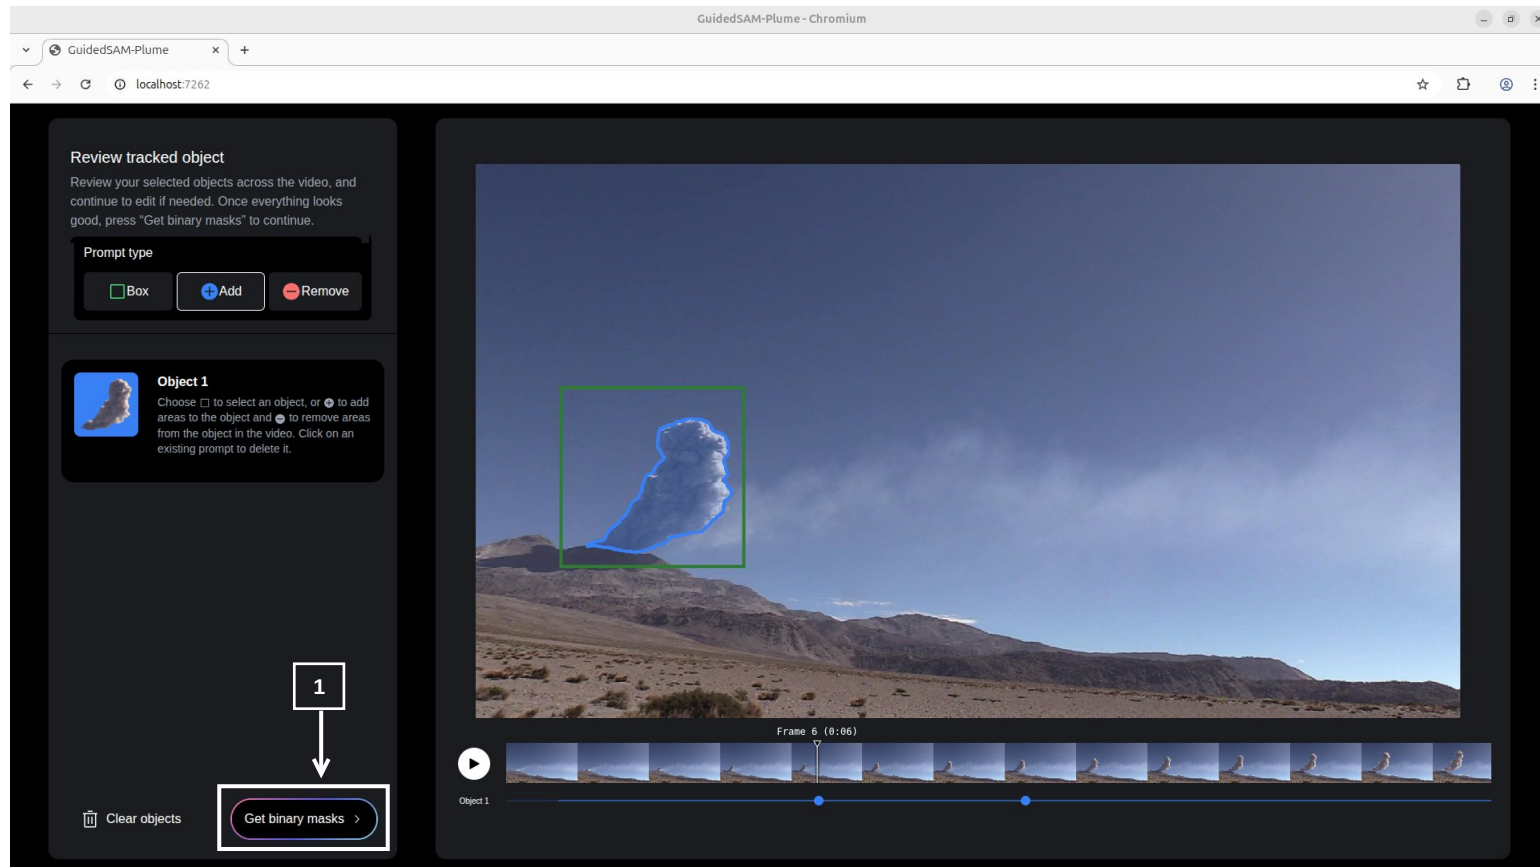

Tip: When *Add* prompt type is selected, a right click will remove areas and vice versa.

Mask editing view: case of videos

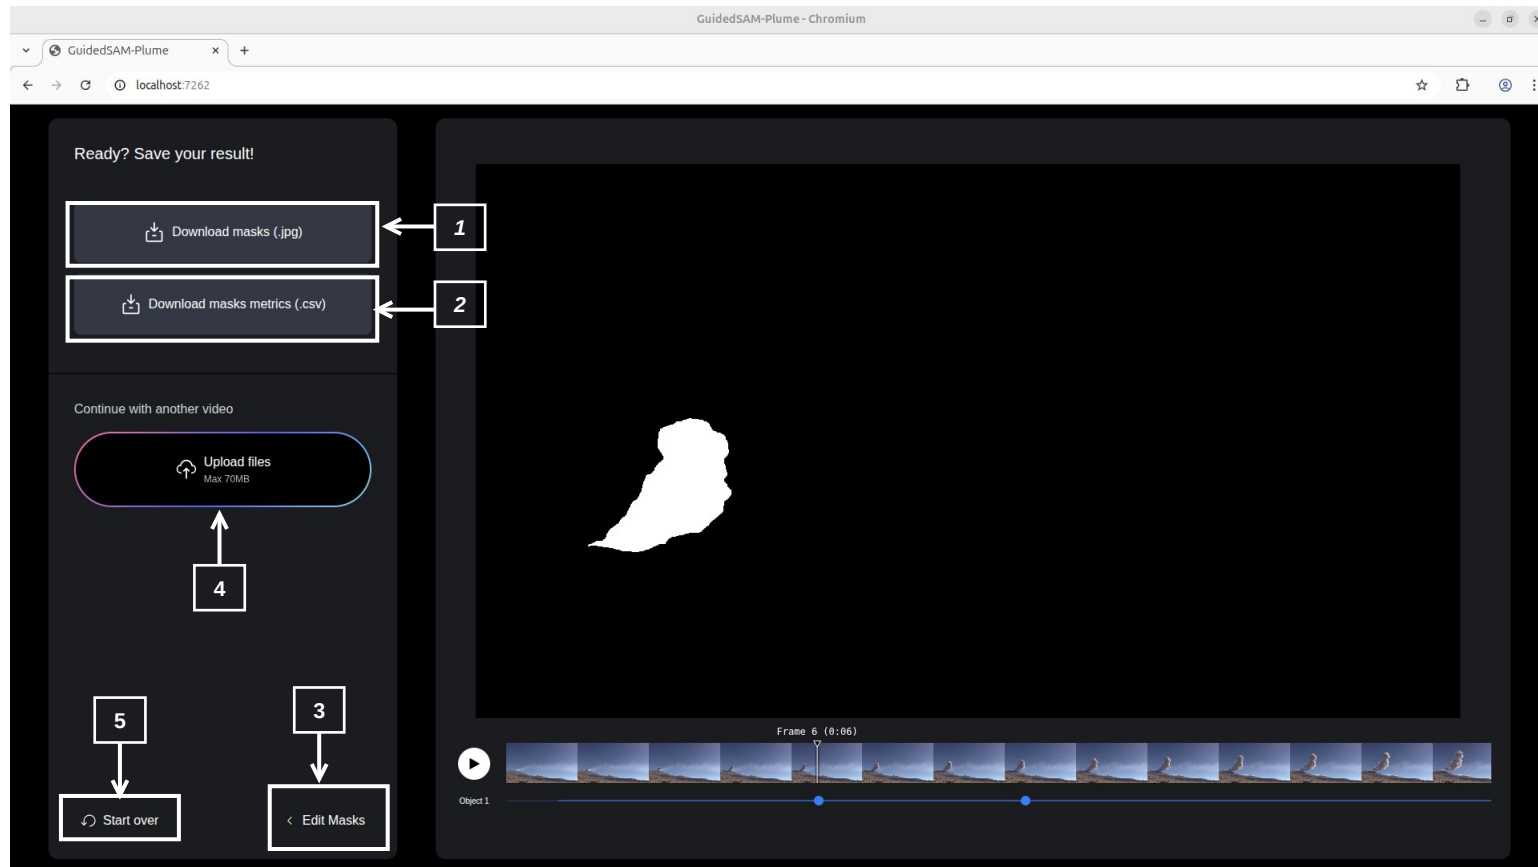

1. If you observe any errors during tracking, you can stop the process to make additional edits.

Mask editing view: case of videos

1. When tracking is ready and you are satisfied with the results, you can get the binary masks.

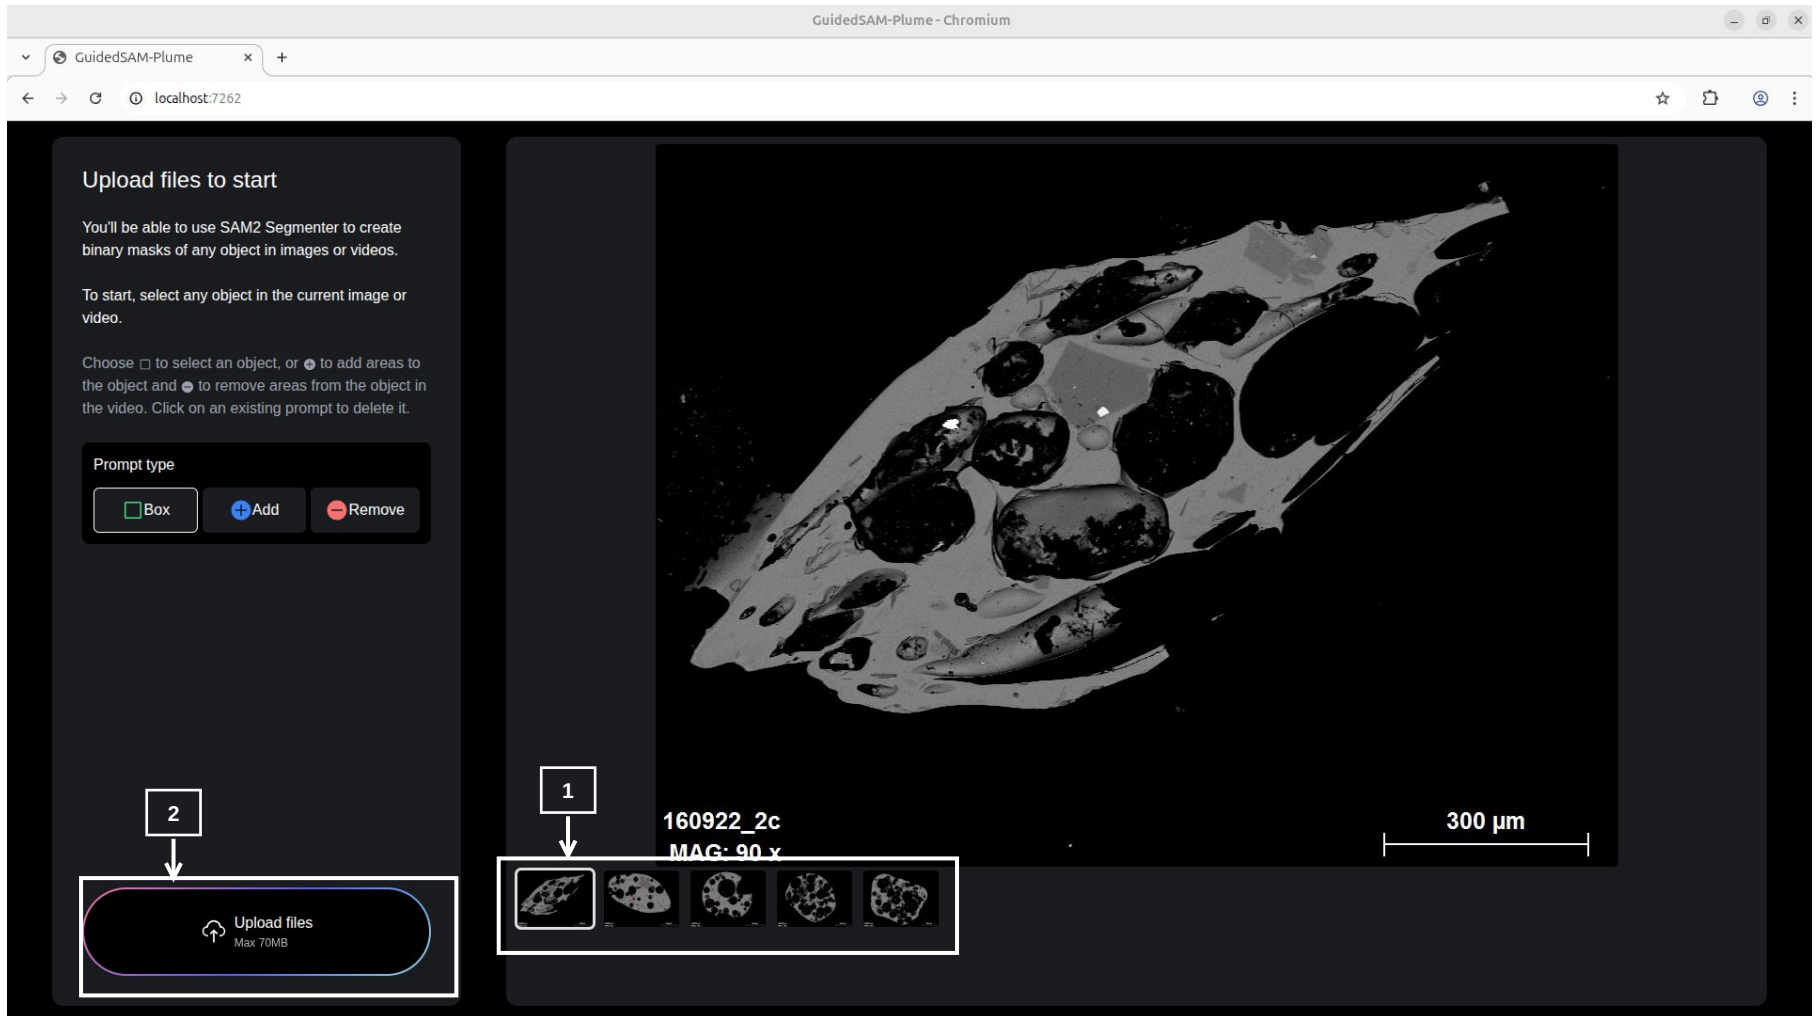

Binary masks view

On this page you can preview the results

1. Download the results
2. Download morphometrics parameters about masks
3. If needed you still can go back to the edit view to make some adjustment
4. Once you are done you can upload a new video
5. Reset the editor

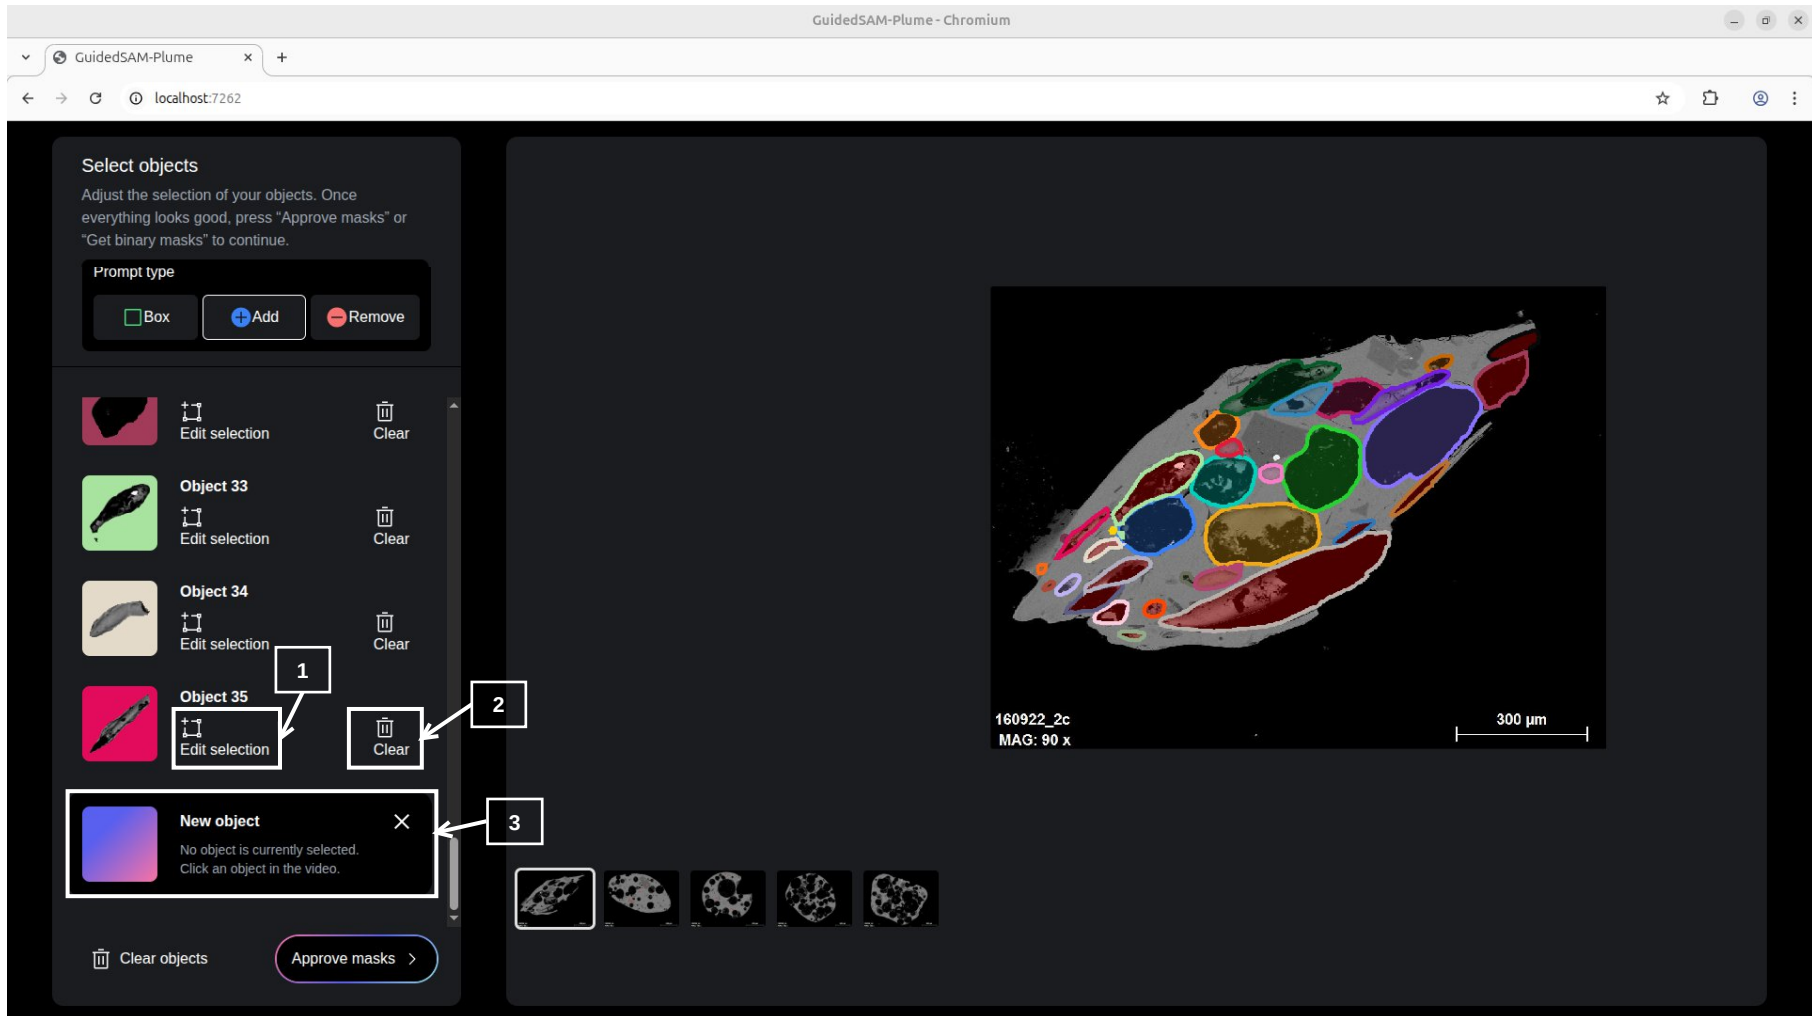

Mask editing view: case of images

Instead of videos you can import one or multiple images

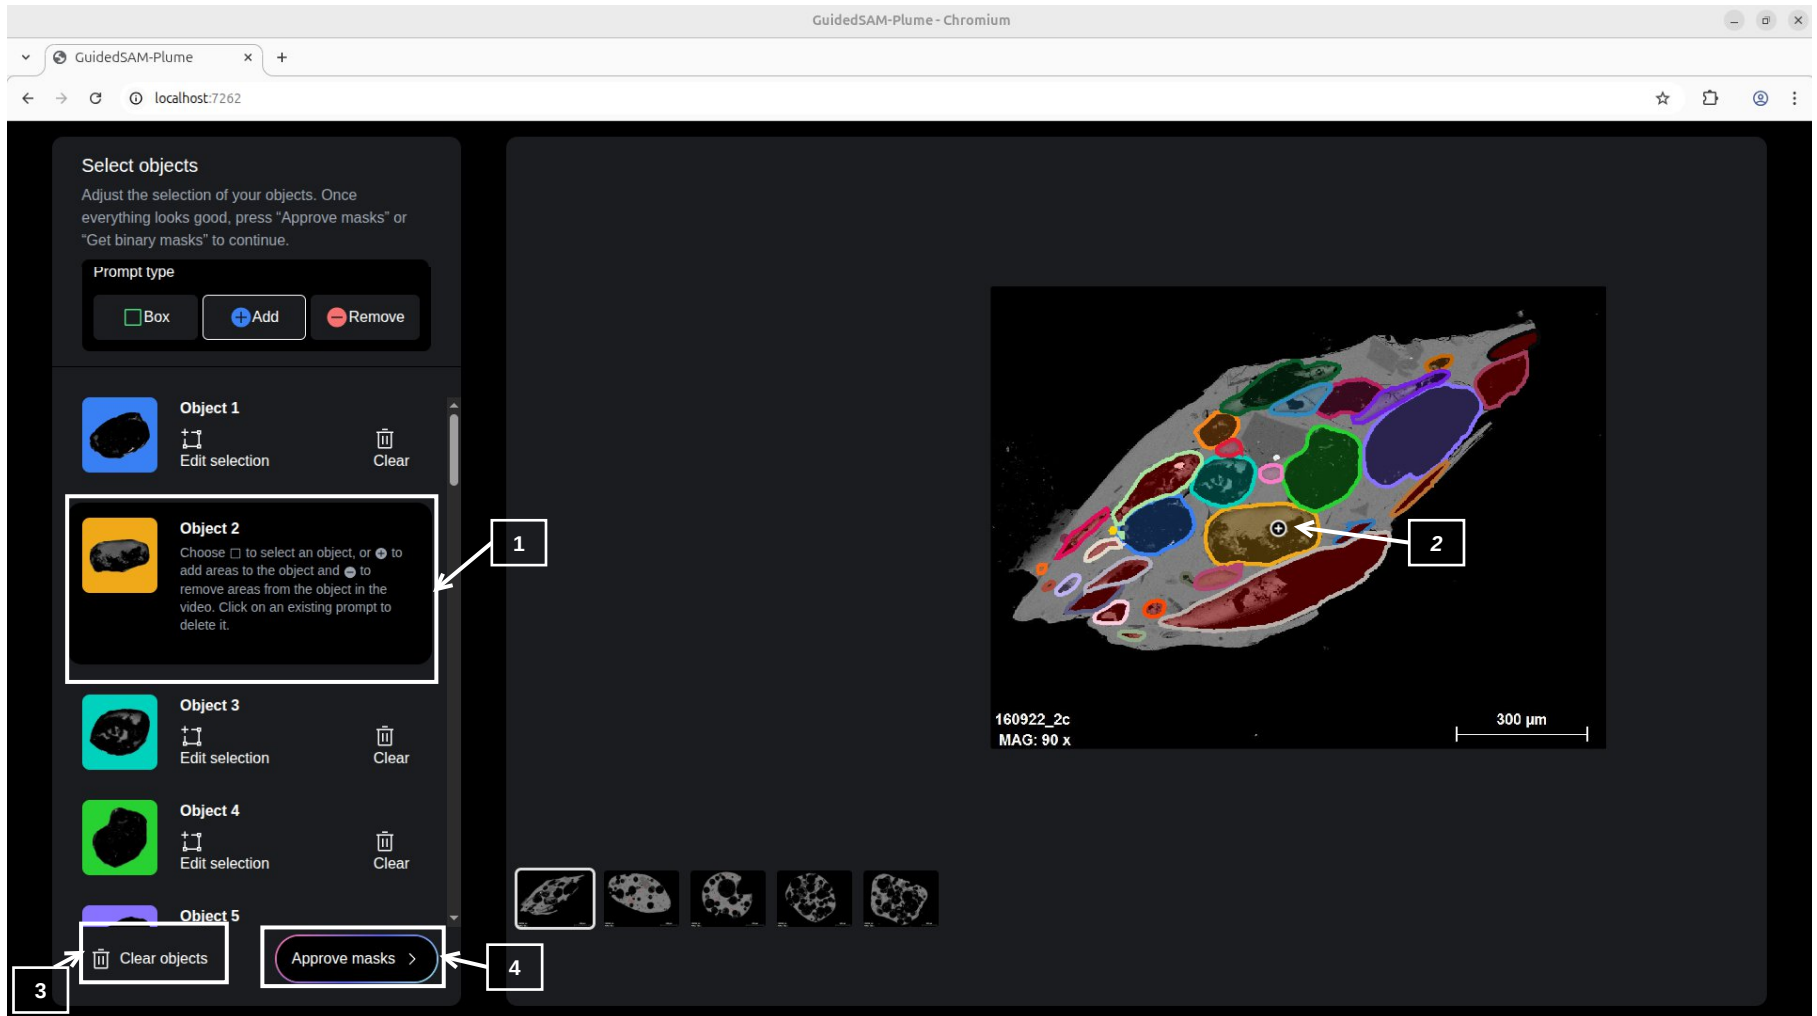

1. Click on a thumbnail to select the image you want to work on
2. Note that if you upload new files, that will replace all already uploaded files. Be cautious if you have unsaved work.

Mask editing view: case of images

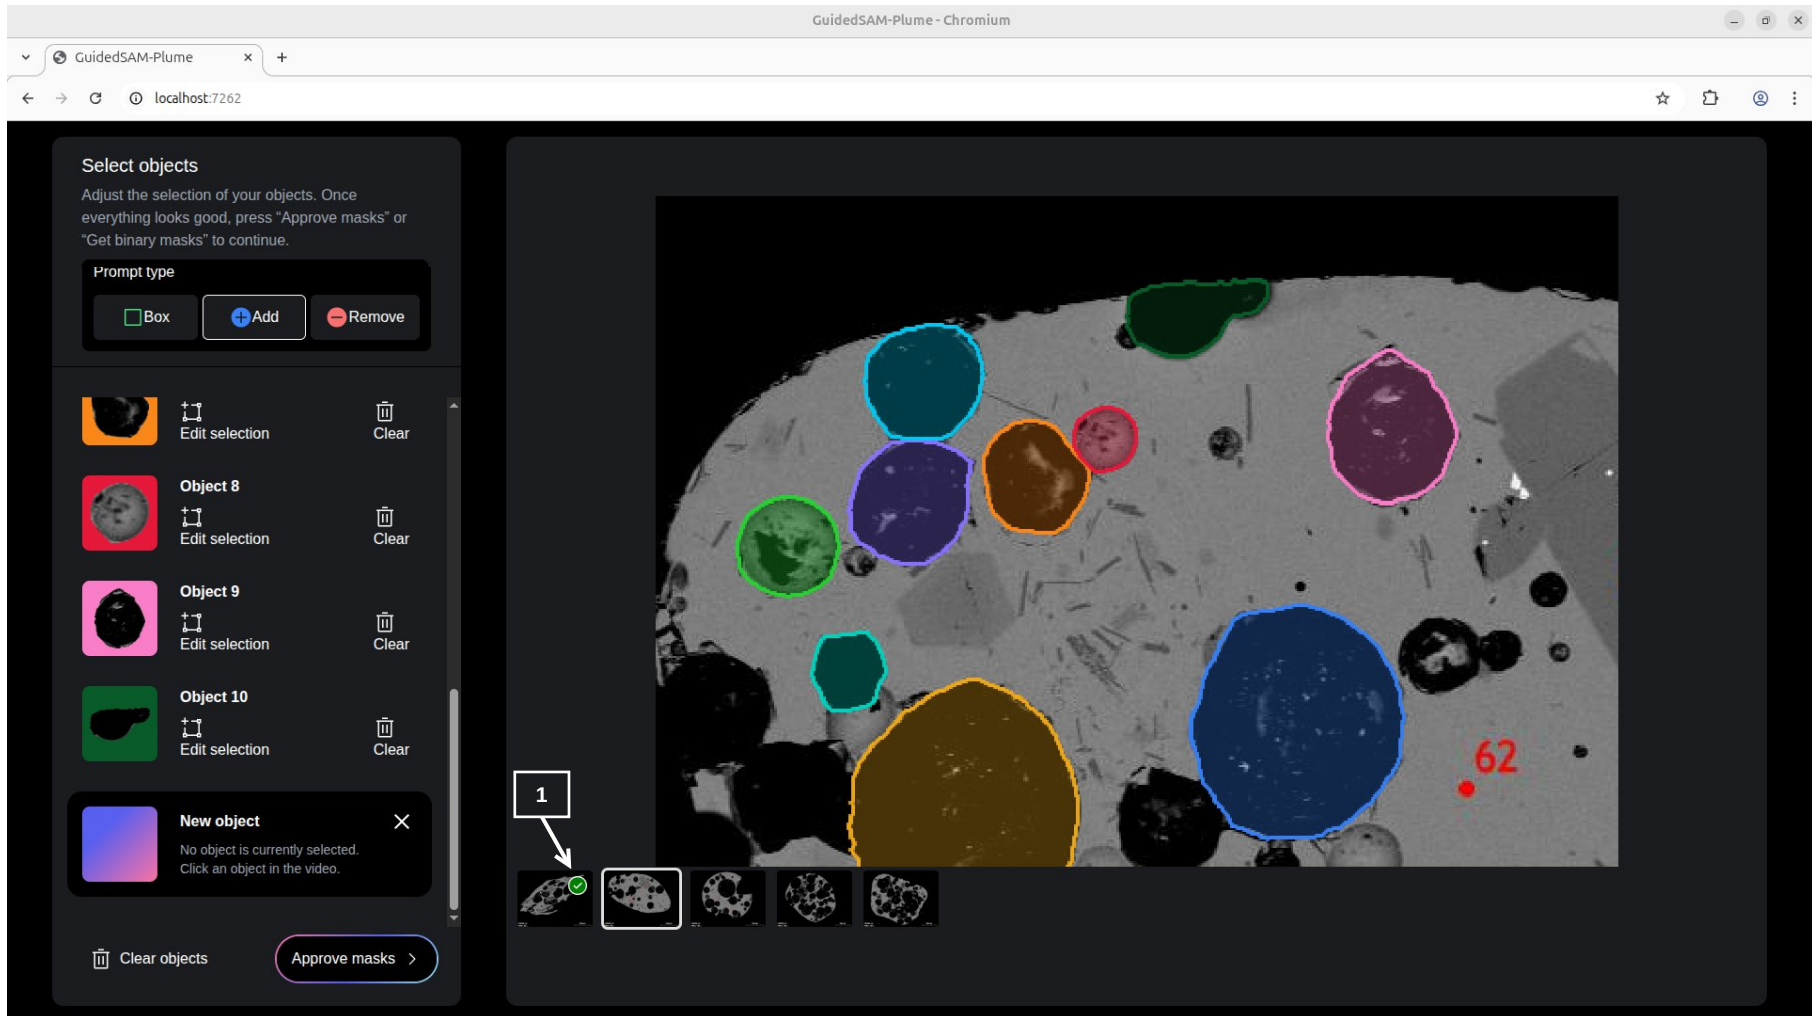

1. Click on an object to select it and be able to adjust selection
2. If you need you can remove an object
3. Click here to let your next prompt create a new object

Mask editing view: case of images

1. This display indicates that the *Object 2* is currently selected
2. When an object is selected you can see the prompts that created it
3. This will remove all objects only in the current image
4. When you are ready with this image you can approve it and go to the next one to be edited

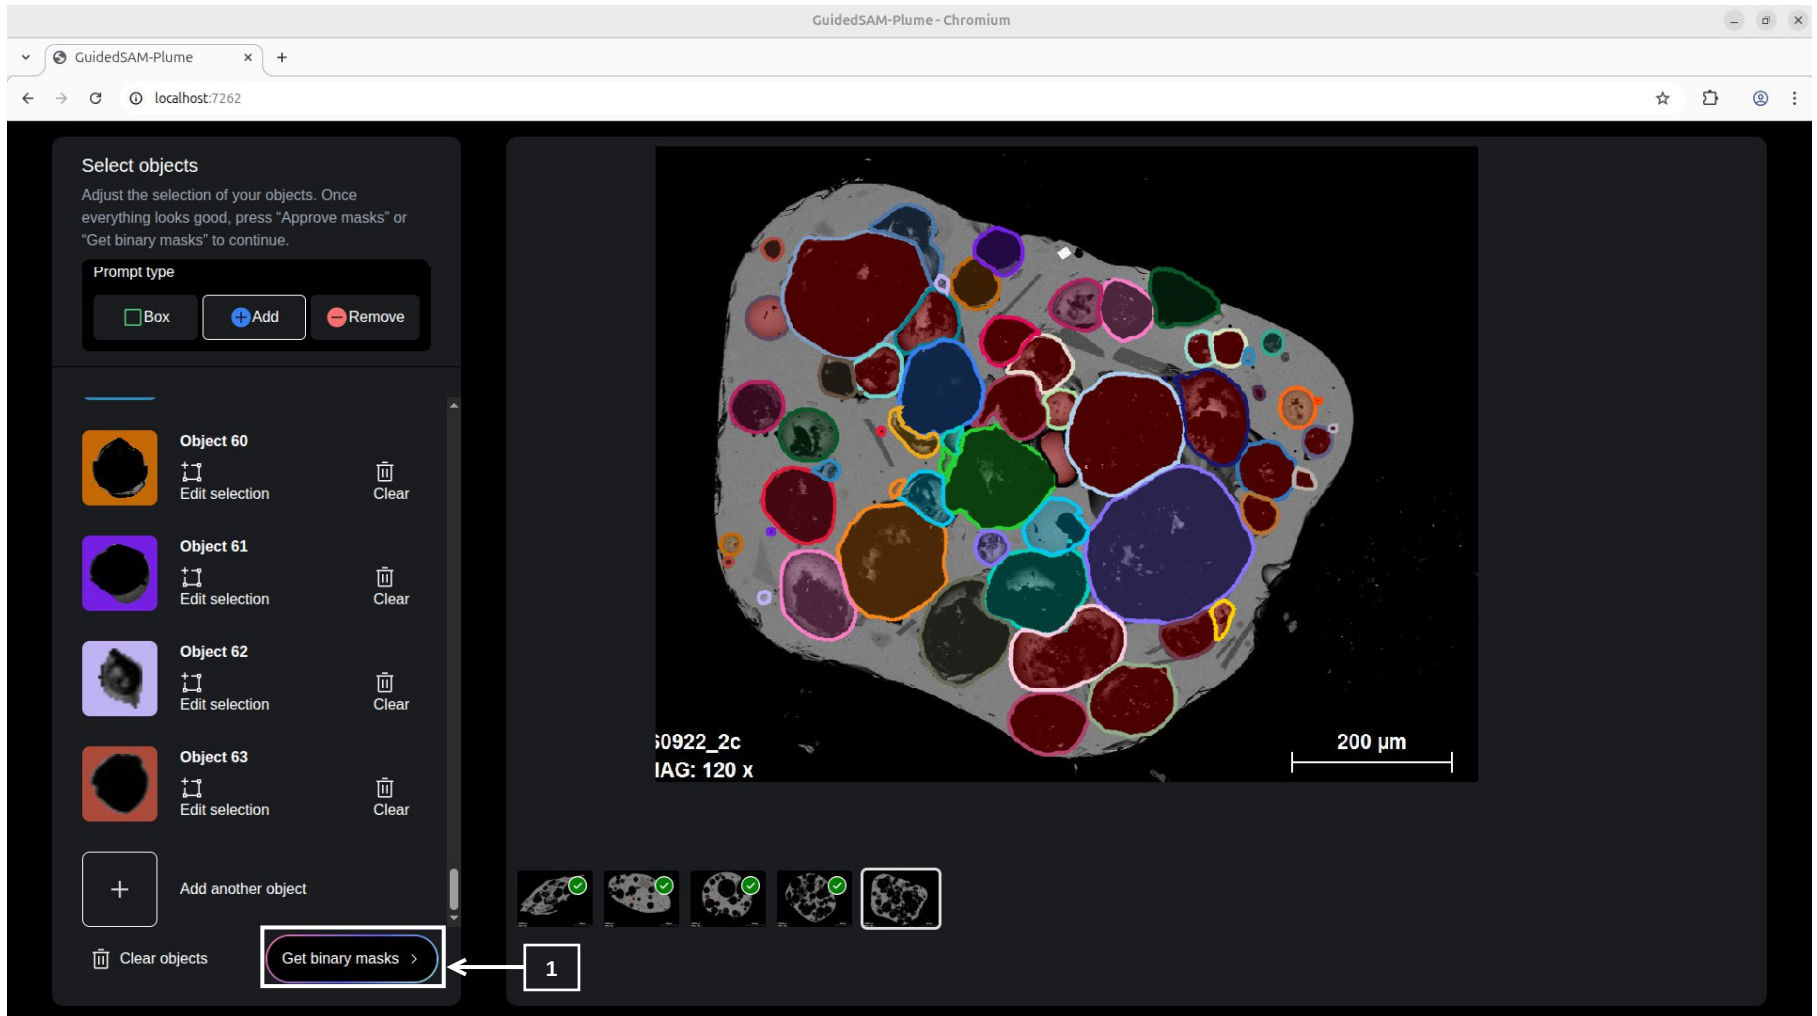

Mask editing view: case of images

1. The green icon indicates that this image has at least one mask

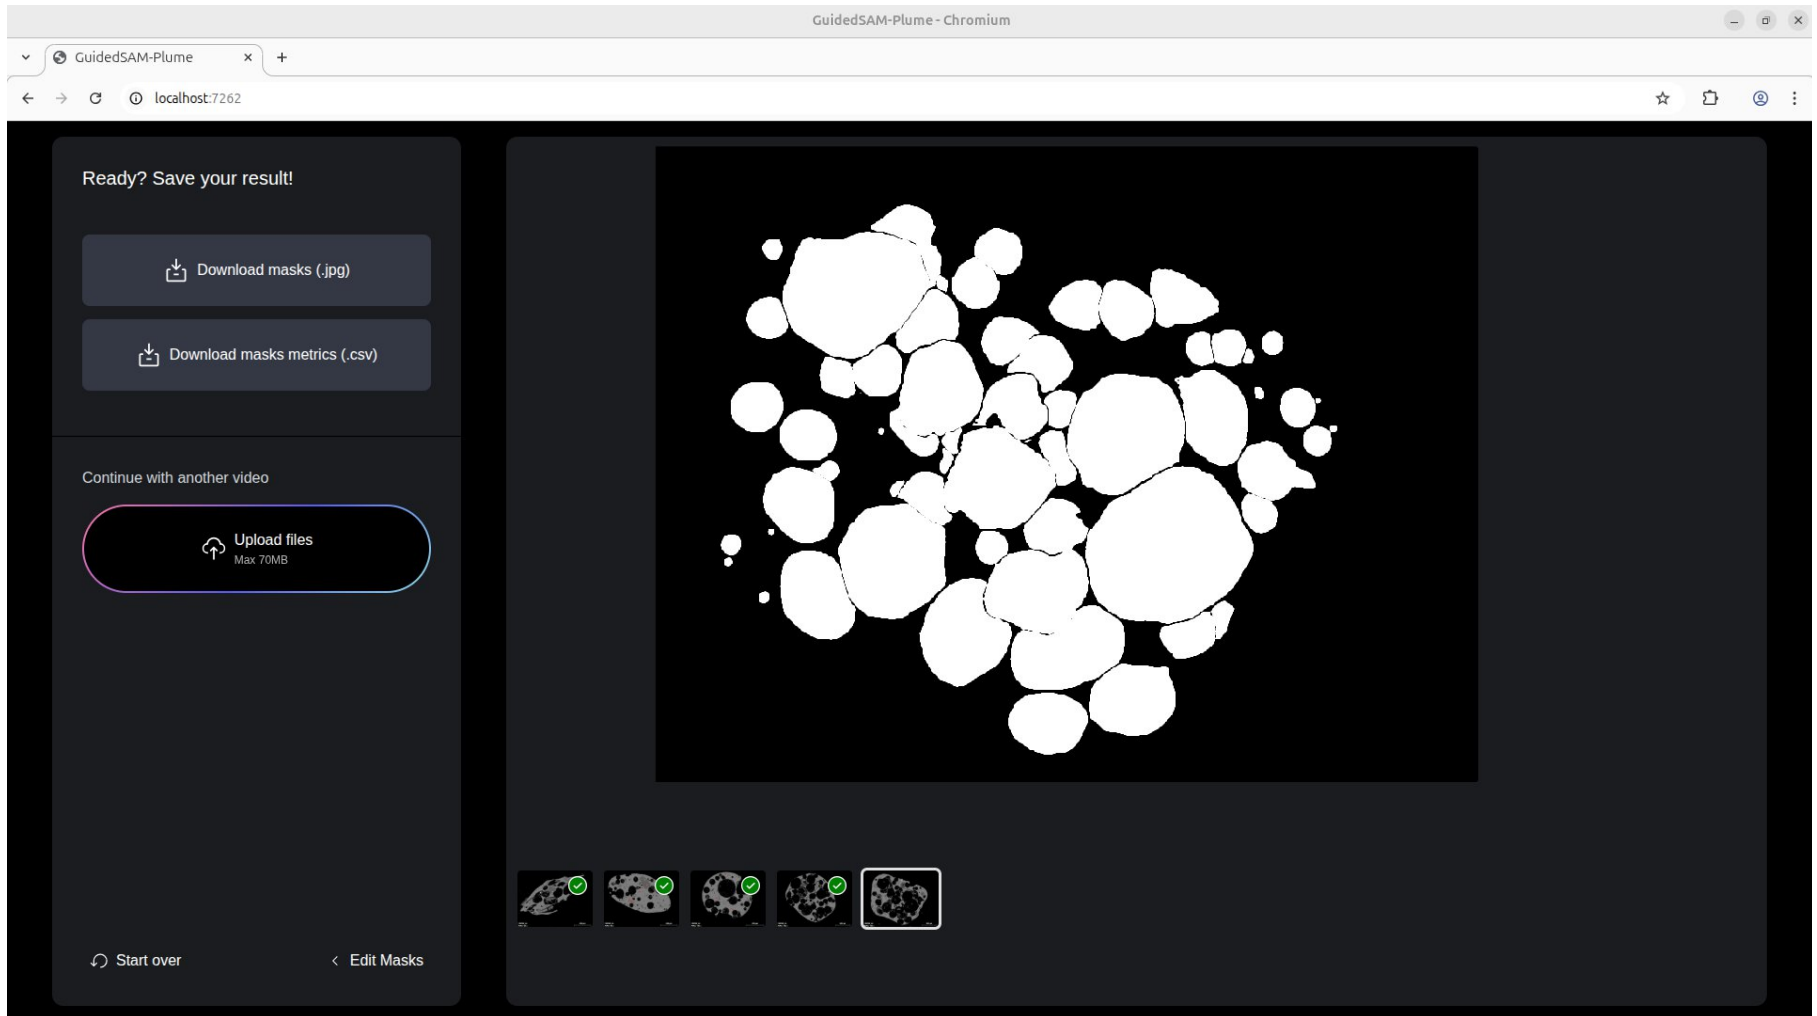

Tip: Don't forget you can zoom in and out to be more precise

Mask editing view: case of images

1. Once you select objects an all the images, you can go with binary masks

Binary masks view

On this page you can review masks for each image, download them and download associated morphometrics values
